Oct 2023 - Present

- Front-End Developer at Mosaïque Pvt Ltd with expertise in developing responsive user interfaces using HTML, CSS, JavaScript, and modern frameworks like Vue JS.
- Skilled in bug fixing, data checking, and ensuring smooth application functionality.
- Proficient in project design planning based on client requirements and fostering collaboration to enhance team productivity.
- Additionally, experienced in working on Japanese websites and fluent in Japanese, facilitating effective communication with clients and colleagues in the workplace.

---

## PROJECTS

### • Project -1 (Company)

#### UVB System

The UVB Control System, powered by IoT, uses UVB light reflection to eradicate insects on farms, cutting down pesticide usage. With remote control via a web interface, it automates UVB light cycles, providing farmers with convenience and monitoring options. By championing eco-friendly farming and improving crop health, this IoT solution aims to sustainably enhance agricultural productivity.

**Stack - HTML CSS Bootstrap Javascript Django (Python)**

### • Project -2 (Company)

#### Indo Mosaïque

The Indo Mosaïque website aims to facilitate business relationships between Indian students and corporate companies in Japan. It fosters connections through internships, cultural exchange programs, and professional development opportunities.

**Stack - HTML, CSS, Bootstrap, Javascript, Vue JS.**

- **Project -3 (Company)**

**Profile System**

Our Profile System provides a streamlined solution for company employees and interns to register employee details effortlessly. With intuitive features, it offers a user-friendly interface for seamless navigation. Additionally, it includes options to track current employee status and locations, empowering efficient workforce management.

**Stack - HTML, CSS, Bootstrap, Javascript.**

- **Project -4 (Personal)**

**Food Order Management**

The Food Order Management System is a dynamic and user-friendly front-end application designed to streamline the process of ordering food. This project caters to both restaurant managers and customers, providing a seamless experience for displaying a variety of food options, making orders, and calculating the total amount.

**Stack - HTML, CSS, Bootstrap, Javascript.**
